

Serial No. 10/800,185
Filed: March 12, 2004
Amendment after Final

REMARKS

Obviousness Type Double Patenting

Claims 20-33 are pending in the application. The Examiner made a number of double patenting rejections in the prior Office Action mailed January 11, 2005; over patent numbers 6,464,964; 5,800,816; 5,965,112; and 6,780,422. In the Final Action mailed June 14, 2005, the Examiner noted that the obviousness type double patenting rejection was withdrawn for U.S. Patent No. 6,464,964. The Examiner maintained the obviousness type double patenting rejection of the claims over U.S. Patent No.s 5,800,816; 5,965,112; and 6,780,422.

Applicants note that their response to the prior Office Action contained four terminal disclaimers for each of the above mentioned patent numbers. Applicants note that only one terminal disclaimer, for U.S. Patent No. 6,464,964 is part of the image file wrapper for this application on the PTO website. Further to Applicants' September 12th telephone conversation with the Examiner, it was noted that the other three Terminal Disclaimers having a mailing date of April 11, 2005 were apparently never received by the PTO.

Accordingly, Applicants submit copies of the three terminal disclaimers that were submitted with their response mailed April 11, 2005. The disclaimers disclaim the terminal portion of any patent granted based upon this application that extends beyond the terms of U.S. Patent Nos. 5,800,816; 5,965,112; and 6,780,422.

The Examiner is respectfully requested to consider the additional three terminal
